

ENVIRONMENTAL POLICY

At ASTILLEROS DE MALLORCA S.A., company dedicated to the repair and refit of yachts, we want to be respectful with the environment we are in, and assure we take care of all the productive process that will interfere with it.

We want to boost a change of mind to a cleaner production, and definitively a cleaner world.

Therefore our commitment is to:

- Observe all existing Spanish and European Community environmental regulations, as well as other marine environmental conventions.
- Review periodically our objectives within this policy framework, making improvement planning that strive us to achieve a greener production.
- Separate waste and manage dangerous residues to avoid land and sea pollution, and contributing to minimize the problem they create in an island.
- Prevent environmental pollution.
- Minimize water consumption, knowing is a scarce good.
- Promote in our clients a respect for the environment that will last after going out of our facilities.
- Raise our collaborators awareness about the environmental care.

Palma de Mallorca, 30th of May 2006

Signed

Diego Colón de Carvajal
Director General
