

After two decades of environmental care certified by Lloyds Register Quality Assurance according to ISO 14.001, our commitment to sustainability remains intact. Our environmental policy is aligned with the UN Sustainable Development Goals (SDG's), aimed at sustainable production and achieving more efficient and lower-impact yachts. ASTILLEROS DE MALLORCA commits to:

Fighting against the climate change

Increase the circularity and sustainability of processes and the eco-efficiency of our repairs

Practicing responsible resource consumption

Minimize and segregate our generated waste, and maximize its reuse and recycling

Prevent air, water, and soil pollution

Reducing water consumption

Promoting sustainability with yacht crew and the nautical communities

Encouraging sustainable solutions among our chain of suppliers

Complying with all environmental legislations and other environmental requirements from Port Authorities

Regularly reviewing our internal processes and facilities to ensure continuous improvement

Periodically reviewing our objectives and goals within the framework established by this present policy whilst maintaining an environmental plan that drives us to strive and improve upon ourselves
